TANDEM PARACHUTING with a flight over the mountains

You are looking for Action – Adrenalin - Adventure? Then come to the airfield in “Zell am See” and get to know something really unique. We will fall with you towards the lake of “Zell am See” between the two mountains called “Schmitzenhöhe” and “Kitzsteinhorn”. During the parachute jumping you will move in an absolutely three-dimensional space. Have a look at the smashing panorama during the steep flight, the free fall and the parachute jump. The jump off will be of a Cessna 182.

Start schooling

The start schooling lasts approximately 5 to 10 minutes. In this time we will prepare you for the jump and we will reply to all your questions in German or English. You will get everything you need for the common jump from us. Your shoes shouldn't have too high heels and not be too heavy. Trainers would be the best. We also have special glasses for you, so you can't miss anything of this special experience. Of course you can also wear your optical glasses or your contact lenses underneath.

Go up flight

You will enjoy the go up flight and the approximately 20 minutes round flight with a brilliant view. You have the opportunity to have a look at the breathtaking panorama. With clear air you can have a view until Munich or Salzburg.

Jump off, free fall and landing

We will start our jump off by sitting in the opened door and a moment later you will find yourself smiling in the free fall. The decisive impulse to let yourself fall renders with joy your tandem master. Afterwards you will fall towards approximately 40 sec long with 200 km/hour. After a so felt eternity the main parachute will softly open. Intoxicated with endorphins, you will hang safely in the opened parachute. In the midst of a unique surrounding we will steer the airfield for landing. During the turbulent free 10 minutes flight you can enjoy the beautiful view once again. We will land by sliding over the ground in a sitting position.
